

Executive Mandate: Grounded in commercial reality, this pricing structure is engineered to be an immediate "Salesforce Killer" in South Africa. It eliminates dollar exchange rate volatility, removes punitive per-seat taxes, covers all operational overheads (including Microsoft 365, database compute, and transactional mail routing), and delivers over **85% gross profit margins** to Mtambo Holdings.

1. Approved 4-Tier Commercial Model (Team-Pack Architecture)

Rather than penalizing South African businesses for every team member they hire, The Finisher Luxury uses **capped team packs**. This provides high perceived value to CEOs while guaranteeing sustainable recurring revenue.

CLASSIC SOLO Solo founders, elite brokers & independent consultants R349 / month 1 Dedicated User ✓ Unlimited contacts & companies ✓ Custom deal pipeline & stages ✓ Fleet & hardware assets (up to 5) ✓ Task management & reminders ✓ CIPC business verification link ✓ Standard email support	MOST POPULAR LUXURY TEAM Growing agencies, boutique firms & sales teams R999 / month Up to 5 Users Included (~R200/seat) ✓ All Classic features included ✓ Up to 5 collaborative seats ✓ Shared team deals & permissions ✓ Support ticket helpdesk system ✓ Full company vehicle fleet tracking ✓ Company laptop & hardware register ✓ Client Admin Team Console	EXECUTIVE SUITE Established corporate firms & multi-branch groups R1,500 / month Up to 15 Users Included (~R100/seat) ✓ All Luxury Team features ✓ Up to 15 executive & staff seats ✓ Multi-branch / department filtering ✓ Executive KPI scoreboard & reports ✓ Automated email workflow triggers ✓ CIPC Section 19 compliance vault ✓ Priority Concierge WhatsApp/Phone	ENTERPRISE Large national fleets, conglomerates & custom ERP Bespoke / custom Unlimited Users & Capacity ✓ Dedicated PostgreSQL cloud instance ✓ Custom API integrations (Sage/Xero) ✓ White-label corporate theming ✓ Custom DNS & private mail gateway ✓ Quarterly business reviews & SLA ✓ Button: Contact Sales

2. South African Tax & VAT Compliance Framework

SARS Regulatory Status (VAT Exemption Advantage):
Under South African tax legislation (VAT Act No. 89 of 1991, Section 23), registration for Value-Added Tax (VAT) is only mandatory once a business generates over **R1,000,000 in taxable turnover** within a consecutive 12-month period.

- Current Positioning:** Mtambo Holdings (Pty) Ltd operates fully tax-compliant and pays Corporate Income Tax (27%), but does not levy 15% VAT on clients at this stage.
- Client Benefit:** South African SMEs and agencies save an immediate **15% cash outlay** compared to VAT-registered corporate vendors.
- Invoice Clause:** Official invoices will state: "All amounts in South African Rand (ZAR). VAT is zero-rated / not applicable under SARS Section 23 (<R1M threshold)."

3. Why South African Businesses Leave Salesforce for The Finisher

The table below reveals the total monthly cost of ownership. American software vendors force South African companies into foreign currency contracts with severe per-seat penalties and zero localized features.

Metric / Feature	The Finisher Luxury	Salesforce (Pro Suite)	HubSpot (Pro Suite)	Pipedrive (Advanced)
Solo Founder (1 User)	R349 / mo (Fixed ZAR)	~R1,850 / mo (\$100 USD)	~R1,850 / mo (\$100 USD)	~R820 / mo (\$44 USD)
Small Team (5 Users)	R999 / mo (Fixed ZAR)	~R9,250 / mo (\$500 USD)	~R9,500 / mo (\$515 USD)	~R4,100 / mo (\$220 USD)
Medium Firm (15 Users)	R1,500 / mo (Fixed ZAR)	~R27,750 / mo (\$1,500 USD)	~R28,000 / mo (\$1,515 USD)	~R12,300 / mo (\$660 USD)
Billing Currency	Fixed South African Rand (ZAR)	US Dollars (Forex Risk)	US Dollars (Forex Risk)	EUR / USD (Forex Risk)
Payment Method	Direct Corporate EFT & Instant Card	International Credit Card only	International Credit Card only	International Credit Card only
Fleet & Hardware Assets	Built-in (Cars, Laptops, Serials)	None (Requires custom dev)	None	None
CIPC & POPIA Compliance	Native SA Legal Framework	US/EU Framework (No CIPC)	US/EU Framework (No CIPC)	US/EU Framework (No CIPC)
Annual Client Savings	Saves client R99,000+ per year	Baseline Standard	-	-

4. The Three Pillars of Our Competitive Moat

1. Zero Forex Exposure

South African CFOs hate dollar fluctuations. If the Rand drops from R18 to R19, Salesforce fees surge overnight. The Finisher provides absolute budget certainty in Rand.

2. No "Per-Seat Penalty"

On Salesforce, adding a junior employee costs R1,850/mo. On The Finisher Luxury Team, 5 seats are included for R999/mo total. Teams collaborate freely without software rationing.

3. Asset & Fleet Entanglement

Once a company registers their Mercedes/BMW fleet, staff laptops, and CIPC profile into The Finisher, migration costs are too high. They stay loyal for years.

5. Unit Economics & Infrastructure Overhead Analysis

To guarantee long-term solvency and profitability, each subscription tier is modeled against our direct operational costs, including Microsoft 365 business email, database compute, and transactional email routing.

Tier Name	Client Price (ZAR)	Direct Infrastructure Cost (ZAR)	Gross Profit per Client	Gross Margin (%)
Tier 1: Classic Solo	R349 / month	~R35 / mo (DB storage, transactional mail)	R314 / month	90.0%
Tier 2: Luxury Team (5 Users)	R999 / month	~R75 / mo (Multi-user compute, mail routing)	R924 / month	92.5%
Tier 3: Executive Suite (15 Users)	R1,500 / month	~R140 / mo (High-volume compute & backup)	R1,360 / month	90.7%

Internal Operational Allocation (Founder Email & Admin):
As specified by the founder, just **one single Tier 1 client (R349/month)** fully pays for two professional Microsoft 365 business mailbox licenses (e.g. sales@mtamboholdings.dev and monde@mtamboholdings.dev at ~R120/seat), enabling seamless, professional tracking of all corporate inbound leads at zero net cost to Mtambo Holdings.

6. Growth & Revenue Projections (Recurring Cash Flow Scale)

The table below models monthly and annual cash flow as The Finisher Luxury scales its client base across South Africa (modeled on an even blend of 40% Tier 1, 40% Tier 2, and 20% Tier 3):

Paying Clients	Estimated Monthly Recurring Revenue (MRR)	Estimated Monthly Server/Email Costs	Net Monthly Profit	Annual Recurring Revenue (ARR)
10 Clients	R8,390 / month	~R650 / month	R7,740 / month	R100,680 / year
25 Clients	R20,975 / month	~R1,500 / month	R19,475 / month	R251,700 / year
50 Clients	R41,950 / month	~R2,800 / month	R39,150 / month	R503,400 / year
100 Clients	R83,900 / month	~R5,200 / month	R78,700 / month	R1,006,800 / year
250 Clients	R209,750 / month	~R12,000 / month	R197,750 / month	R2,517,000 / year

**Note: Once ARR crosses R1,000,000 (at approximately 100 active clients), Mtambo Holdings will officially register for VAT with SARS, transitioning smoothly without disrupting existing client pricing.*

7. Glossary of Terms (Plain English Explanations)

To ensure clear communication across both executive leadership and non-technical stakeholders, the key technical and financial terms used in this proposal are explained below:

1. CRM (Customer Relationship Management)

Software that helps a business manage and track all interactions with clients, deals, sales pipelines, follow-ups, and customer service requests in one unified platform.

2. SaaS (Software-as-a-Service)

A cloud software distribution model where customers pay a recurring subscription (monthly or yearly) to access the application via a web browser, rather than buying and installing permanent software on physical computers.

3. MRR (Monthly Recurring Revenue)

The predictable, highly reliable revenue that Mtambo Holdings generates every single month from active subscriptions. If 50 clients pay R999/month, MRR is R49,950.

4. ARR (Annual Recurring Revenue)

The annualized value of recurring subscriptions (MRR multiplied by 12 months). This is the key benchmark investors, banks, and acquirers use to evaluate the net worth of a software business.

5. Unit Economics

The direct revenues and costs associated with a single customer. It answers the fundamental question: *"After paying the server, database, and email costs for one client, how much pure profit is left?"* (In our case: >85%).

6. Forex Risk (Foreign Exchange Exposure)

The financial vulnerability that occurs when a South African company pays for software in US Dollars. When the Rand weakens against the Dollar, the software becomes significantly more expensive without any warning. The Finisher eliminates this by billing exclusively in fixed ZAR.

7. Per-Seat Tax (Per-User Penalty)

A pricing practice popularized by Salesforce where companies are charged a heavy fee for every single user login. The Finisher avoids this by offering generous team packs (e.g. 5 users for R999).

8. Tenant Isolation & Multi-Tenancy

An architectural security standard where every client's data (deals, contacts, assets) is sealed inside its own private digital vault. Client A can never view or access Client B's data under any circumstances.

9. CIPC (Companies and Intellectual Property Commission)

The official South African government agency responsible for registering and verifying companies, directors, and legal compliance. The Finisher integrates business profiles directly with registered CIPC entity records.

10. POPIA (Protection of Personal Information Act)

South Africa's primary data privacy law (Act 4 of 2013). Section 19 legally obligates companies to protect customer personal information against unauthorized access, loss, or data breaches.

11. Pro-Forma Invoice

An official preliminary bill sent to a corporate client requesting payment before service activation, complete with Mtambo Holdings bank account details, branch code, and payment reference.

12. SLA (Service Level Agreement)

A formal commitment defining uptime standards, response times, and priority support guarantees provided by Mtambo Holdings to enterprise subscribers.
